OUTDOOR LIGHTING

Hello,
nice to meet you
we are

LUTECH

CONNECTED BY LIGHTING

one LUTECH, one **lighting** world

We think that outdoor lighting is one field with different needs and approaches. Our main challenge, using our experience, is to propose creative solutions to enlighten your outdoor living space.

As LUTECH, we have made this open choice to embrace this field of activity most completely.

Architectural, with wall and ceiling decorative lamps, specific light effects, functional with directional or recessed lights, the garden, the paths and terraces... Entering in the solar lighting is more than trendy, the solar energy being an active part of our future.

Begun recently, the activity related to safety and comfort has gained importance. New connected camera ranges are developed. The world of colour and programming to manage all your lights now enters our collections.

One world, different faces, different segments developed with the same concern of quality and efficiency.

discover what's new

make your outdoor life smarter

LUTEC introduces a range of Outdoor luminaires with the integrated TUYA connected light module. Combining high quality weatherproof aluminium fixtures with endless possibilities to control the powerful LED light.

Always connected

Thanks to the Bluetooth mesh technology, with sender-receiver module inside every lighting device, there will be no problems to reach all your connected luminaires. Also the ones in a more remote position.

Correlated Colour Temperature

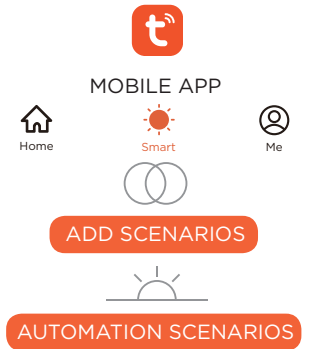

The lighting module offers you a complete scale of CCT tuneable whites. In this way you can create a cosy warm white light or dynamic cold white light setting in your garden.

Convenient, Comfortable & Personal

Thanks to the "groups" function and "automation scenario's" function in the TUYA app, you can create & program the perfect outdoor atmosphere for every occasion.

Intelligence Inside

Give it your own twist

LUTEC offers a number of new outdoor LED wall & bollard lights, for consumers, who want to create versatile light effects around their homes in a playful though convenient way.

Red Dot Award Winner 2019 Product Design

"Truly a great achievement and a testimony to the good design of the CUBA, tuneable up & down Outdoor LED light"

Create your own lighting designs

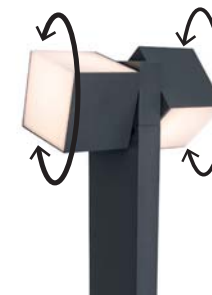

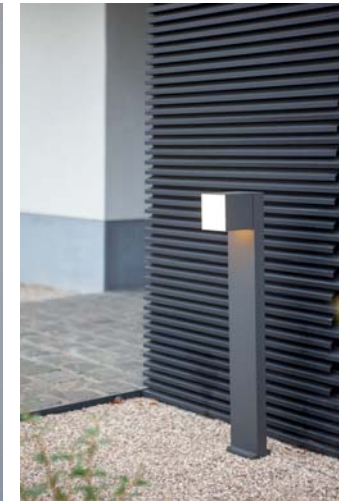

Next to the CYRA model in round shape with similar characteristics, LUTEC has extended this well appreciated range with a number of one head wall & bollard versions. Compact solutions, providing the same superb lighting effects and product flexibility.

"Total Eclipse of The Heart"

You can turn around the two half moon shape diffusers of the new ECLIPS model over an angle of 90 degrees. In this way creating a combination of an Up & Down light, a Wall Washer or a Frontal light effect.

reddot award 2019 winner

there's a new tradition

Next to the retrofit-series CATE & KELSEY, LUTEC introduces this year the new FLAIR tradition series.

Cottage flair around your house

The FLAIR lantern-family offers you a complete range Wall & Bollard lights for all your garden & terrace applications. A special double-head lantern and portable table lantern will give you plenty of choices to make your favourite ambience light settings.

Vintage flair LED filament bulbs

You can apply the newest decorative filament LED bulbs in the FLAIR models. These lamps are now available in all forms & shades. The connected & tuneable models will facilitate the full control of the lights at your personal desire. A warm amber glow turns your garden into a cosy & charming environment.

P 207

Always connected with your home

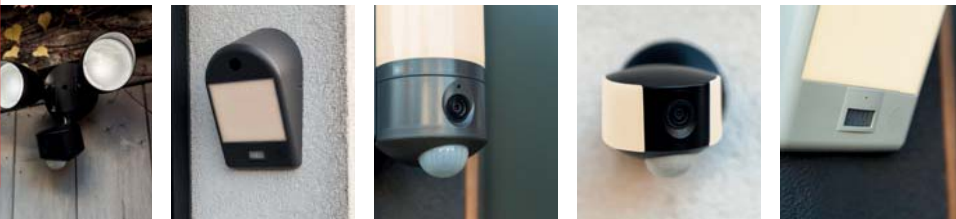

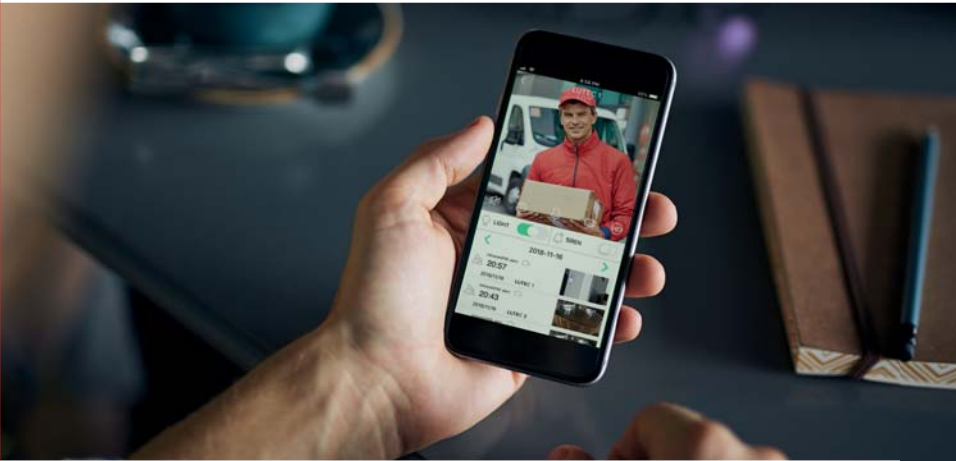

As market initiator LUTEC is proud to present the 2nd generation of the connected camera range.

Improved camera & connectivity

This brand new range has been developed based on learning and consumer insights over the last 3 years and by applying the gains and innovations of the fast evolving connected technology.

Keep an eye at your front door

This has resulted in a limited range of compact and very convenient camera lighting fixtures, ready to install or to make a swift replacement of your actual outdoor luminaires.

let the sun POPPY

LUTEC has a variety of different concepts covering the complete solar energy field.

A lighted flower

New in the portable offer is the POPPY Solar floor stand, the all in one lighting solution to enjoy your summer nights.

Party all night long

Designed for private gardens and for professional use on the terrace of your favourite restaurant or summer bar.

connected light

CONNECTED LIGHT is now already the future for all your lighting applications in the garden and around your home.

LUTEC offers two different solutions. A range of Outdoor luminaires with the integrated WiZ connected light module, operating on WiFi technology and featuring dimming, whites and colours. Allows you to take full control of your lights anytime and anywhere.

Adopting the Bluetooth mesh technology, the new TUYA connected ranges, are also suitable for distant installations in your garden. CCT control from Warm White to Cool White with a simple move on your smartphone. Convenient and creating the desired tuneable light.

ARCHITECTURAL applies to all lighting installations for homes, terraces and gardens covering a contemporary and modern design.

LED's have drastically influenced the creation of new lighting products. Need for efficiency but also for harmonious integration when using one or several products : wall, bollards, ceiling and bulkhead designs. The offer is responding to architectural variety, location and living contexts. A good match can be found in between the luminaire and the architectural elements, in form, colour or material.

solar? yes, please!

SOLAR covers a variety of different concepts in the field of renewable energy lighting solutions. The portable range illustrates light mobility, pleasant and ubiquitous to use. The wall lights and bollards are built following two principles, using an integrated or independent solar panel, quick and easy to install. Today the highly efficient solar panel in combination with powerful LED modules are giving a really satisfactory light level. Making the most out of the available solar energy is cleverly realised by intelligent user interfaces such as 3-step dimmers, timers and PIR-sensors.

-  LED module with strong light output: 100 lumen up to 500 lumen
-  Li-ion rechargeable battery included

-  Integrated dusk to dawn sensor, automatic switch to light-on during night
-  Weatherproof materials and finishing

how to choose

-  **solar panel Integrated**
Compact, no extra wiring
-  **Separate**
Higher solar energy capacity
-  **orientation of solar panel Fixed**
The luminaire should be placed in the most optimal position; south orientation
-  **Adjustable**
The panel can be oriented in the most efficient position; south orientation (tilt angle 35° in summer - 65° in winter)
-  **orientation of LED light Fixed**
Diffuse light - Up & down light
-  **Adjustable**
Directional spotlight
-  **clever control PIR motion sensor**
Smart use of the available solar energy
Always light when somebody is passing
-  **High-Medium-Low switch**
Personalized choice to come to ideal combination of light output and autonomy

poppy

portable post

All in one Solar lighting solution. Trendy & convenient design. Listen to your favourite music on your terrace or in your garden during a lovely summer night.

InMotion

Security Sensor Light

security for your **comFort**

LUTEC launches the InMotion concept offering a complete range of Security Sensor Lights.

The range is featuring now, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house. The 2 stand-alone PIR sensors with multiple controls make the range complete.

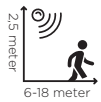

Passive infrared (PIR) motion sensor

How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

Your personal settings

Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

For your convenience

Dusk to dawn

Automatic light on switching as soon it's dark outside

Ambient Light

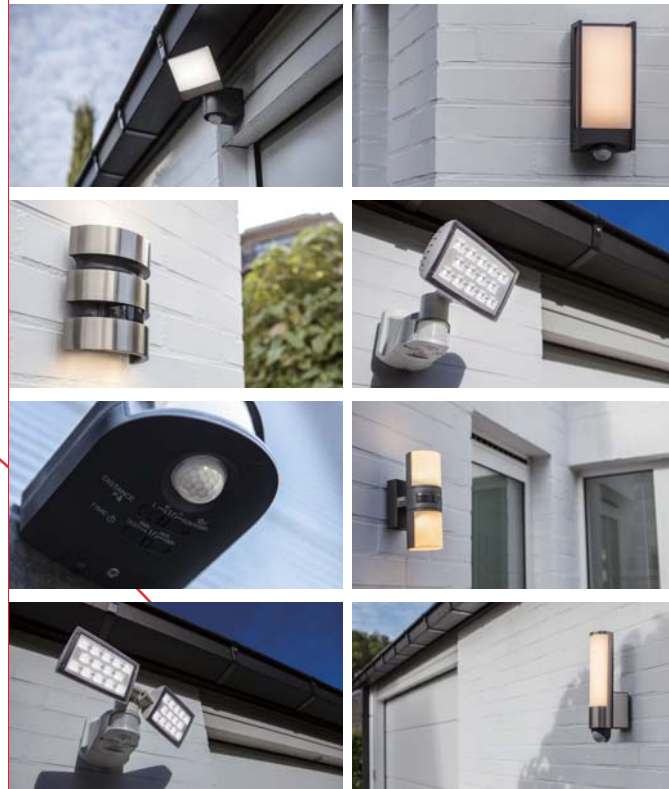

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

Test mode

You can define the perfect detection area during installation in daylight situation

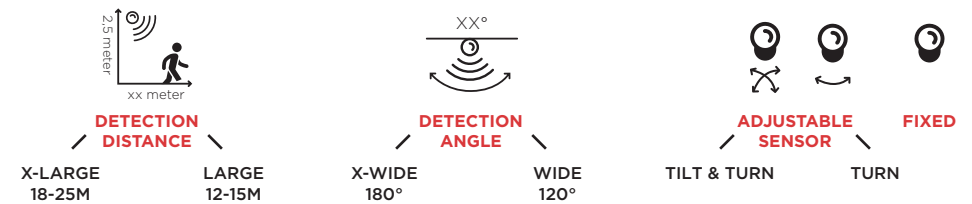

How to choose?

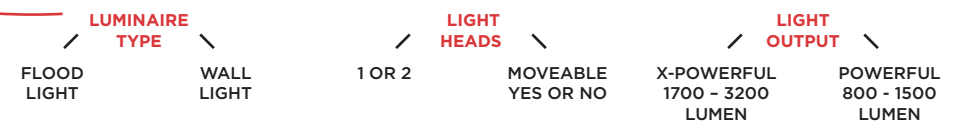

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

BASED ON SENSOR DETECTION REACH

BASED ON LUMINAIRE CHARACTERISTICS

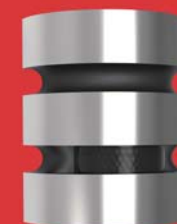

maya

The new version of security floodlight has a very powerful LED with a double adjustable motion sensor. Front sensor has a detection range up to 20 meters, the sensor covering the area under the floodlight detects movement close to the wall. The PERI series is easy to install and no tools are needed, comes in a single and double headed spot and is suitable for wall and ceiling mounting thanks to the rotating base."

Die Cast Aluminum

introducing our company

40 years of experience

The beginnings of a lighting company

Originally set up as a national aluminium die-cast factory, we gained our first experience of outdoor lighting by producing bulkhead lights & classical garden lanterns. Our quality standards have always met international standards and the first export shipment was made in 1996. The new factory in Yuyao became operational in 2001, concentrating on modern garden & professional lighting resulting from a booming international demand. From 2009 a close collaboration with the Design(Pool) had two objectives; to create a stronger offer for the ODM market and to develop a platform for our own brand of lighting. LUTEC was launched in 2010, focusing on architectural LED lighting and the introduction Solar Energy Products. The success of the company resulted in the opening of a second production facility in 2012, fully devoted to future developments in design and new technologies.

Nowadays Lighting is both essential and magic.

The challenge of lighting market is to create products which are a balance between the shape, impact and attractiveness however, they must also provide real functional values. The LED revolution has completely changed the game, giving many new opportunities. Added to this we must not only continue to offer the latest technical innovations but also anticipate and provoke them, especially with solar energy and smart lighting controls. To serve our objectives, we have continued to expand our international network and organisation: with new central warehouses in Belgium and China, establishing partners in many new countries allowing us to continue building our corporate identity and providing our partners with unique product support and marketing.

Future is already here Support the users

Today we are all surrounded by the interactive and connected World. For many reasons it is evident that the lighting market must also embrace this new internet age. The need to control our lighting, at will, from afar and to suit our environment is a must have feature. Temperature, color, dimming, activity sensors and timing controls are the norm. Programmable solutions for energy saving, interactivity between multiple light points or installations are becoming standard. Security options with camera vision, live video and recording are no longer a futuristic dream as LUTEC products can perform all of the above.

Whilst it is true, LUTEC is a young brand, it is built on a strong manufacturing background (40 years of experience) and a solid reputation of technological expertise. Manufacturing involves imagination and efficiency.

Why we decided to establish a brand?

The brand gives us a needed visibility. The brand allows us to anticipate the market, to make our own choices related to trends and to make developments such as we perceive them through our partners in different countries. Connected by lighting underlines our intention to develop products in accordance with the final consumers, through all our network and distribution channels. Having become a major player in the lighting field, our main objective is to consolidate our offer through creativity, our designs evolve and involve the highest level of quality and services.

welcome to the lutec center

connected by lighting

The LUTEC centre is in our HQ in Yuyao and located on our production site, it is an International meeting venue where new concepts, innovation & strategies are studied then created and shared, with our partners.

We provide an expert platform in design, sales and services. We have the will to show and experiment different approaches creating choices for the short or medium terms. Staying close to our customers, which by extension also means the final consumers, allows the right design solutions to be found. Our team is trained to be proactive and reactive. The key to realise a win-win product is to always explore the possibilities, look outside the box to find the best solution.

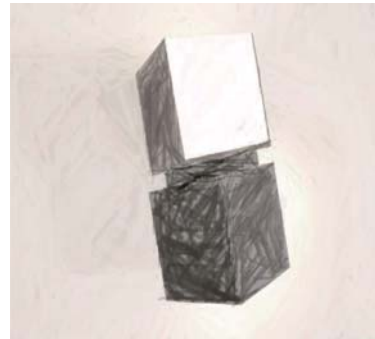

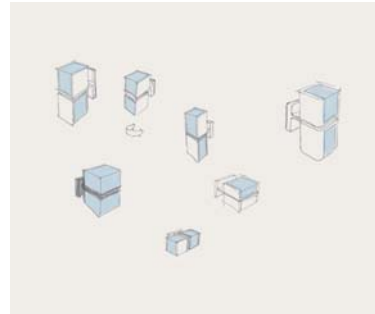

In our view innovation is always closely linked to a right level of realization.

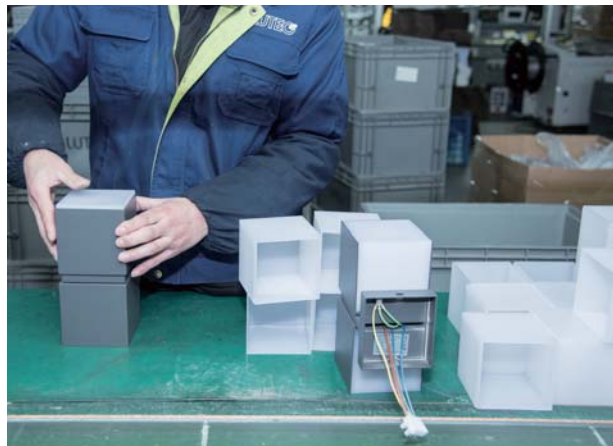

design & engineering

design, engineering & manufacturing, all interactive.

One of the main decision we have taken in the LUTEC organisation is to break down the walls between of each department to improve product strategy. This brings a culture of flowing communication between the services where everybody has a positive role to play in all projects. It works because we consider that we are all concerned in the success of a product.

We all know development is complex with many obstacles to overcome however by working together helps our team to aim for the perfect solution as smoothly as possible. Knowledge is shared at all levels. Creativity, marketing, engineering, production, and sales are all one, this method improves time to market significantly.

warehousing & transport

global logistic footprint assuring availability & proximity.

Unlike many manufacturers in this sector, LUTEC keep significant levels of completed stock which is packaged and ready to ship. This is in addition to our stock process flow, feeding our satellite distribution centres in Europe and elsewhere around the World. Our aim is to reduce the lead time wherever possible on key products.

CCW
China Central
Warehouse
Yuyao - China

ECW
European Central
Warehouse
Bornem - Belgium

Since 2014, the European Central Warehouse is fully operational. This warehouse located in Belgium, centrally situated in Europe with an average lead time of 7 days for most shipments within Europe, LUTEC products are always within reasonable reach.

We offer different transport options: direct shipment, cross docking or pick-up, in co-operation with each territory. The ECW product portfolio now contains 200 sku's.

Now, we've also the possibility to assure different value adding trade marketing services in the ECW.

LUTEC quality

As a global supplier, our products are fully compliant with all relevant technical & quality requirements of the different regions in the world.

All LUTEC LED products benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

Subject to conditions, please see our website.
www.lutec.com/warranty

Integrated LED Light-engines

In the majority of our ranges we use dedicated LED light engines. The LUTEC in-house engineering/production departments only use primary component suppliers, constantly improving the performance of the total LED product, resulting in a higher lumen/watt ratio as well as increasing levels of lumen/monetary ratio.

Low Energy Cost: LUTEC products offer at least an 80% saving compared to traditional sources
Long Lifetime: up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

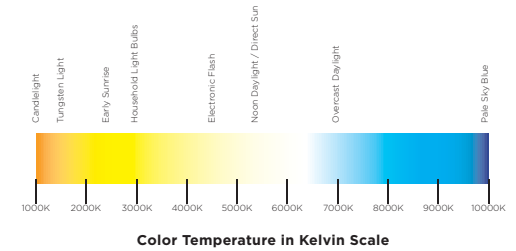

- Lumen Maintenance: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse
- ERP compliant

The LED driver is the heart of the LED module and is the main influencer of the life-time. LUTEC develops these drivers to the specification of the product for best performance. The production of the SMD's used in the LUTEC-drivers is done in-house in our approved SMT assembly lines. All drivers are compliant to all relevant standard and regulations. UL-GS-EMC-FCC-ERP.

The **Light Color** or **Color Temperature** in Kelvin (K) gives a clear indication about "whiteness" of the LED light.

Standard we apply the 4000K Daylight. For most fixtures with diffuse light and vintage look a 3000K Warm White light is installed. The more functional work & security projectors have an integrated LED source with a 5000K Cool White light.

The **Color Rendering Index (CRI)** gives on a 0-100 scale an indication the color accuracy. Determining the ability of the light source to reveal the colors of the object faithfully in comparison with a natural light source. In all LUTEC fixtures we apply a CRI of minimum 80%. For outdoor applications this is an ideal level.

The **Luminous Flux** of an Outdoor fixture indicated by number of Lumen. (lm) is the total amount of light which comes out of the fixture in all directions. It gives a good measure of the brightness you can expect. This Lumen indication is a better way to describe the level of illumination as opposed to wattage.

	Standard	25 W	40 W	60 W	75 W	100 W
	Halogen	18 W	28 W	42 W	53 W	70 W
	CFL	6 W	9 W	12 W	15 W	20 W
	LED	4 W	6 W	10 W	13 W	18 W
	Brightness Lumen	220	400	700	900	1300

The **Luminous Efficacy** in Lumens/Watt gives a good measure of the optimal conversion of the electrical power into useful light. This is an important parameter with direct impact on the electric energy cost for your installation. Thanks to the continuous developments the LED solution is already today one of the most efficient light technologies. The Luminous Efficacy is one of the main parameters for the determination of the Energy Efficiency class.

According to the EU regulation no 874/2012, for energy labelling of electrical lamps and luminaires, requires manufacturers to inform consumers of the Energy Efficiency class.

LUTEC LED-fixtures are rated at a minimum **Energy Efficiency class of A+** or higher, further information is available on our website; www.lutec.com.

materials & Finishes

LUTECH exterior products are produced using high quality materials and finishes with excellent weather protection properties as well as mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum (ADC 12) with a thickness of 2mm, is in most cases the preferred material, our process ensure no air holes. The LUTECH In-house fully automatic powder-coating & water painting installation provides excellent protection against corrosion.

LUTECH benefits from an in-house tooling workshop for both aluminum and synthetic components. This facility provides us with high quality production especially where premium Stainless Steel is used, typically in ground recessed spotlights using grade 304 & 316 steel. For the wall & bollards: 201 & 202 is utilised with an electrophoretic paint, resulting in an additional layer of protection.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: in most cases ABS, this is a strong, light-weighted material and can be used under low and high outdoor temperatures. For the diffusers: the impact proof and very resistant PC (polycarbonate) is used in opal or transparent version. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

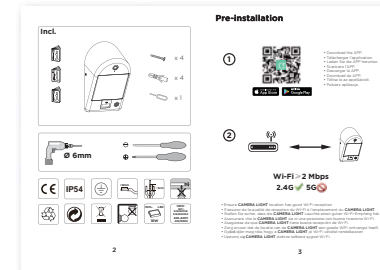

mounting, installation & maintenance

Instruction Manual

LUTECH pays a lot of attention to a user friendly and effective yet simple instructions, we strive to find time saving methods of installation using uniquely designed interfaces where possible. Every LUTECH Outdoor fixture has a clear instruction manual in the unit box and this manual can also be downloaded from our website.

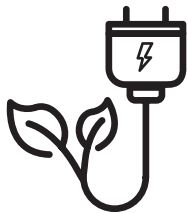

IP rating table

0	Protection against solids	0	Protection against liquids
0	Not Protected	0	Not Protected
1	Protected against Solid Objects greater than 50mm	1	Protected against Dripping Water
2	Protected against Solid Objects greater than 12mm	2	Protected against Dripping Water when tilted to 15°
3	Protected against Solid Objects greater than 2.5mm	3	Protected against Spraying Water
4	Protected against Solid Objects greater than 1mm	4	Protected against Splashing Water
5	Dust Protected	5	Protected against Water Jets
6	Dust Tight	6	Protected against Heavy Seas
		7	Protected against the effects of Immersion
		8	Protected against Submersion

The LUTECH Outdoor fixture comply to the International standards concerning Ingress Protection. All articles have a minimum IP44 rate. For some specific applications (Ex. in ground recessed spots) the protection rate goes up to IP67.

Sustainable vision

LUTECH constantly strives to reduce the impact of manufacturing on the environment, our intention to become a wholly sustainable company by continually improving our processes. All our designs start from a sustainable mindset, offering our customers low energy consumption LED- solutions or fully energy neutral SOLAR energy alternatives.

Service network

Our service network is available on global level through our LUTECH Partners. Contact details: www.lutech.com/services/global-network

LUTEC brand identity packaging

The LUTEC corporate identity has been revamped in line with our evolving brand values. New trade support tools and POS have been created to support our products and our customers providing an integrated selling solution, all of which adds value and distinguishes the LUTEC offer from our competitors.

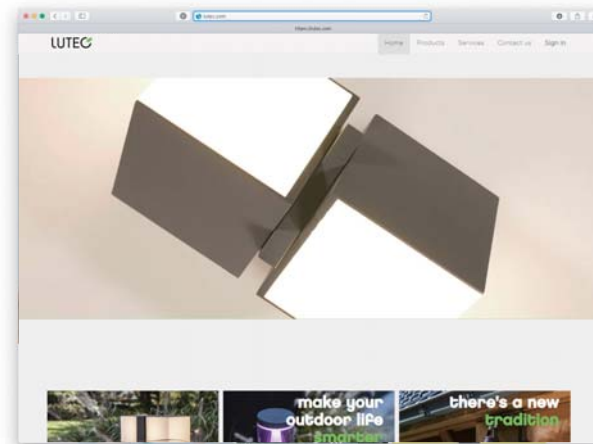

2019 sees the introduction of the fully refreshed packaging, being applied to our complete portfolio. We believe the new look of the new packaging is fresh, vivid and in tune with our style of products.

The product is always the hero with an inspiring photography. The refreshed LUTEC logo is visible from all sides of the packaging which together with the green banner this will further improve the brand recognition. The most relevant characteristics (lifestyle) are shown on the front, top and second side, this is combined with an in situation image. The lifestyle image on the front is repeated on the third side and creates the right atmosphere for each product style. The rear of the carton contains comprehensive technical information utilising innovative graphic icons. The EEL label and the short description translation in 8 languages makes the information complete.

LUTEC brand identity rich content

We're constantly creating new communication materials to support and improve the presentation of LUTEC products, allowing ease of selection. All support materials are accessible through our refreshed website www.lutec.com. Where you can find the LUTEC database with all kind of "rich content": product photos, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpacking experiences, etc.

All support materials may be used for numerous marketing initiatives such as driving traffic to your own landing pages on your websites via social media. Content can be created in a convenient and attractive way resulting dynamic information and content to inform and inspire the customers about the LUTEC products.

LUTEC brand identity

in-store support

Based on consumer insights and specific requests from our customers, we're proposing a large number of in-store support tools. Always starting from the same idea: the product - proposition is king, the customer should be guided in a clear way facilitating clear product selection in a convenient way. Together with the refreshed look & feel to the LUTEC brand communication, we have adopted an inspiring and convincing communication for the various product segments.
